

Fruit Fillings for ice cream on a stick

This is a line of unfinished products rich in whole, diced or pureed fruit, ideal for filling ice cream on a stick. This line combines a compact structure with clearly perceived fruit in every bite and persistent softness even at negative temperatures. They are special fillings designed for use with industrial dispensing systems. The company's research and development focus is attentive to the market trends, creating new flavors every year.

Advantages

Compact pieces, readily perceptible with fresh, natural flavor

Inspirations

Plain and coated ice cream on a stick, sherbets, parfaits.
