chocolate bars,  
muesli and granola*

# HG FRUIT LINE

*For energy and protein bars,  
chocolate bars, muesli and granola*

## Innovate with osmotic dehydration

The **HG Fruit Line** was developed with an innovative stabilization method studied by our R&D. Using natural osmosis, we remove part of the water from the fruit and then dry it with an innovative and gentle process, which inhibits the water activity to decrease the moisture content and make the product stable. **Cesarin's HG line is also available in the light version without added sugars.**

The addition of **HG fruit** in preparations, helps to improve the taste and visual effect, but also to increase the nutritional value enriching the final product. The high dry contains and low water activity of **HG fruit**, makes it also suitable for products that require a long shelf-life.

Thanks to its extraordinary functional and sensory characteristics, **Fruit HG** opens up a whole range of new value-added applications in the food industry.

### Osmotic dehydration strengths:

- Maintains **vitamins, minerals** and **fruit nutritional values**;
- Maintains the **fruit natural taste**;
- Natural **appearance, optimal texture and color**;
- Long **shelf-life**;
- Only **natural ingredients**: without preservatives, gluten-free, GMO free;
- Rich in **fiber**.

## HG Fruit

		Packaging
Apple HG	cubes 6x6 mm	Crt Kg 5
Apricot HG	cubes 9x9 mm	Crt Kg 5
Blackberry HG	whole fruits	Crt Kg 5
Blackcurrant HG	whole fruits	Crt Kg 5
Blueberry HG	whole fruits	Crt Kg 5
Cranberry HG	minced	Crt Kg 5
